

RFQ

Q: After a long time use, the mouse move not smooth?
A:(1)Most time is the battery low power, pls user to exchange new batteries (AA alkaline battery, the voltage is 1.5V per battery)
(2)There is interference of RF devices weather or not, far away from jamming equipment
(3)Plsuse it on the mouse pad

Q: The 2.4g spectrum is high than mobile phone, radiation is big?Is this 2.4g tech is harm for human health?
A: The spectrum is high than mobile phone ' s, but the radiation is low. The size of radiation not only determined by the frequency of high and low, it ' s has much relation of transmitted power. The transmitted power of phone can reach 1W, and the transmitted power of 2.4g wireless mouse just one over ten thousand of phone, greatly reduces the radiation to human body.

Wireless mouse specification
GD7820

FCC Certification Requirements
Caution: Any changes or modifications in construction of this device which are not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with part 15 of the FCC Rules. Operation is subject to the Following two conditions:
(1) This device may not cause harmful interference, and
(2) This device must accept any interference received

Note:This equipment has been tested and found to comply with the limits for a class B digital device,pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.
This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions,may cause harmful interference to radio communications.However,there is no guarantee that interference will not accor in a particular installation.if this equipment does cause harmful interference to radio or television reception,which can be determined by turning the equipment off and on,the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Product structure

Operation

Open the battery compartment put AA battery into battery compartment, insert the battery as shown inside the battery compartment.
1.insert the mini transceiver into the USB port of computer.
2.turn on the power, after charged, the mouse will be used normally(first time, the system will show find a available USB device ,and will automatically finish the installation)

Function

- Rubber roller: prevent slippery, wear-resisting, feel comfortable
- Mini transceiver : plug and play

Attention

- 1.when travel, please put the mini transceiver into the assigned slot release, in case of loss.
- 2.when long time not use the product, please take out the battery.
